

PONDOZ BLUE BEAUTY DAM & LAKE DYE

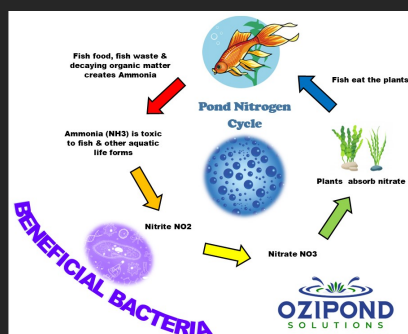

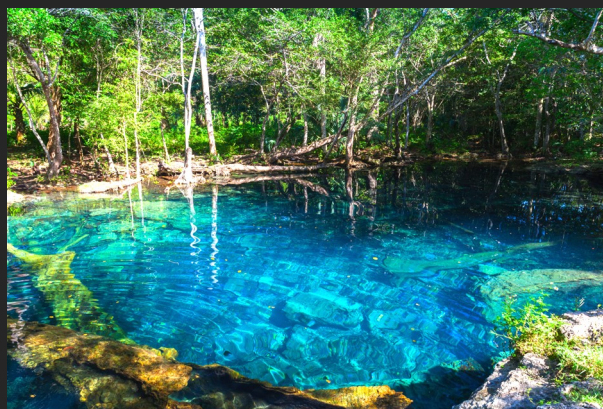

PONDOZ BLUE BEAUTY DAM & LAKE DYE is a concentrated blue dye which is effective in reducing UV light penetration into the water, slowing algae growth.

PondOZ BLUE BEAUTY DAM & LAKE DYE also reduces water temperatures & evaporation rates in larger water bodies. Cooler water temperatures result in higher dissolved oxygen levels and improved beneficial bacteria performance.

PondOZ BLUE BEAUTY DAM & LAKE DYE can also be used to tint the water for aesthetic purposes. Once the dye is diluted into the water body it will not cause staining to clothes, rocks, sand or other items.

Use **PondOZ POND/ LAKE FIX ENZYME** in conjunction with PondOZ BLUE BEAUTY DAM & LAKE DYE to eliminate algae's food source long-term.

SAFE FOR ALL PLANTS, ANIMALS & WILDLIFE
